on the Wagga/Holbrook Road)

## WHERE ARE THE QUANTAM LEAPS IN PROFITABILITY & MARKETING – WHAT CAN WE LEARN FROM DAIRY?

The dairy industry has embraced simple technologies in genetics and data management. Much of these systems have significant application in lamb. The 'Making Lamb Black and White' field day focuses on simple technologies that we believe will offer a quantum leap in productivity in the lamb industry. Many of Australia's leading dairy, lamb and marketing speakers will be on hand to provide insight to the next generation of lamb systems.
